

YOUR FBO MIGHT BE CLEAN – BUT IS IT FLYSKILLS HYGIENE CERTIFIED CLEAN?

Every aspect of Private Jet Operation has been rocked by Covid-19. As flight numbers start to grow, travellers are no longer happy to accept standard procedures for FBO cleanliness. With Flyskills procedures that are independently verified combined with our Hygiene Certification, FBOs can now clearly demonstrate industry-leading hygiene standards to their customers.

THE NEW CLEAN CERTIFICATION

FlySkills Hygiene Certification gives FBO operators a means of proving to their customers that not only is their FBO kept sanitized but also that independently verified processes are in place to ensure that any chance of transmission of communicable disease has been minimised as far as possible.

STAYING AHEAD OF THE CURVE

FlySkills Hygiene Certified FBOs receive access to the latest news, updates and best practices in order to maintain hygiene standards and reduce the risk of transmission of contagious diseases.

INTERNATIONALLY RECOGNISED

FlySkills Hygiene procedures have been created in partnership with Socotec – the world leaders in testing, inspection and certification in environmental safety. Combined with the experience of our partner FBOs around the world, FlySkills hygiene procedures are leading the standard in the industry.

SIMPLE, CLEAR, UNDERSTANDABLE

The procedures provided by FlySkills Hygiene Certification are being made available to FBOs around the world in a ready-to-use format in order to quickly promote a new standard of hygiene and cleanliness.
